Professional Summary

Data Scientist and ML Engineer with strong proficiency in Python, SQL, and modern ML/DL techniques. Adept at building predictive models, NLP applications, and computer vision solutions. Experienced in using tools like OpenCV, Streamlit, and TensorFlow to create real-world AI systems. Passionate about solving complex data problems and contributing to data-driven product innovation. Seeking roles in Data Science, Machine Learning, Software Development, or Data Analysis. Hands-on experience with Docker (containerization, images, networks, running multi-container apps). Worked with AWS EC2 instances for deploying applications.

Skills

Technical Skills: Python, Java, SQL, Data Science, Machine Learning, Deep Learning, NLP, CNN, RNN, OpenCV, Streamlit, Docker, AWS EC2, Cloud Deployment, CI/CD basics with Docker

Soft Skills: Problem Solving, Team Collaboration, Quick Learning, Communication

Projects

- Gesture Recognition System – Built a virtual mouse and eye-tracking control system using Python, OpenCV & MediaPipe. Improved accessibility with over 85% gesture accuracy.
- Resume Screening Tool – Developed a Streamlit-based resume parser with similarity scoring, reducing manual screening time by ~60%.
- Document Summarizer (NLP) – Created a real-time document summarizer using extractive NLP techniques, capable of processing 500+ words in <2 seconds.
- Contour Detection (CV) – Detected tampered image areas using edge analysis in OpenCV; achieved ~90% detection accuracy.
- Housing Price Prediction – Built ML models (Random Forest, Linear Regression) for price estimation with R^2 score of 0.87.

- Card Fraud Detection – Implemented real-time anomaly detection for fraudulent transactions using unsupervised learning.
- Sentiment Analysis – Classified movie reviews using TF-IDF + Naive Bayes (achieved 85% test accuracy).
- Simple WebApp Deployment with Docker & AWS EC2 – Containerized a Flask + MySQL application, created custom Docker networks, and deployed on AWS EC2. Gained experience in building Docker images, running containers, and exposing services via security groups.

Education

B.Tech in Computer Science and Engineering

Noida Institute of Engineering and Technology, Greater Noida, India

Nov 2021 – Jun 2025

Certifications

- IBM (Coursera) – Data Analysis, Machine Learning, Deep Learning with Keras
- Infosys Springboard – Deep Learning for Developers
- Coursera – Java Programming, OOP, Data Structures
- DSA Toolbox – Linked Lists, Trees, Problem Solving

Leadership & Achievements

- Vice-President & Founder, Ekume Club – Organized tech events and hackathons
- Head Coordinator, JettSetters Club – Managed tours and photo walks
- Karate Medalist – National & State-level awards (Fight & Kata)
